Business Operations

2026 Goals & Focus

Mission Statement

We fuel Supercell's **growth** by **empowering and challenging** game teams, enabling **effective decisions** that deliver **measurable impact at scale** to **benefit our players.**

The Central Teams and Embedded Functions form a joint growth engine

- **The Central Teams** coalesce the shared vision, ensures clarity on goals, strengthens cross-team data fluency and cooperation, and builds common frameworks, playbooks and tools that raise the bar across the portfolio.
- **Embedded Functions** work as co-creators, shaping and refining these ideas through hands-on experimentation and game-specific execution. Their ongoing insights and content feed back into the central frameworks, creating a continuous loop of improvement.
- **Together**, the two teams ensure that strategy and execution evolve in sync, delivering measurable and scalable growth.

We unlock value that only *together* we can create

The Central Teams and Embedded Functions form a joint growth engine

- The Central Teams

- Embedded Functions

- Together

We unlock value that only *together* we can create

Who are Business Operations?

LiveOps & Monetisation

Data, Analytics & Insights

China Business Team

Performance Marketing & ASO

Portfolio Games (Boom Beach)

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

Problem Statement:

We want to **focus on what really matters**, build **shared understanding**, and stay aligned across teams **delivering value to our players**

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

- Clear goals, visibility and shared commitment to delivering on them
- Hypothesis driven, Impact prioritised decisions & opportunities
- Data literacy and democratisation (common language)

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

Problem Statement:

We want to **unlock the full potential** of our games and deliver **best in class journey** for our players

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

- Built for Mastery, resourced full stack teams
- Tools to accelerate and scale our processes
- Best practices are codified and implemented (Regional pricing, Pricing, Content Cadence & seasonality, measurement and attribution)
- Segmentation & personalisation of the player journey from discovery through onboarding to retention
- Day to day player experience (Calendar, CRM) - knowing WGLL and actioning on it

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

Problem Statement:

We want to **focus on continuous improvement** on top of break out success to ensure **growth and learnings**

2026 Focus

Diligence in Performance

Operational Excellence

Compounding Improvements cycles

- While continuing to pursue breakout success…
- …Maintain a steady cadence of uplifts and speedy bets by experimentation & iteration in UA, ASO, features, content, China vs. Global
- Building the tools, talent, and ways of working that empower calculated risk taking and unlock higher performance for our game teams
